October 2010

CLUB ELECTIONS

Nominations are being accepted for club officers this month and elections will be held in November. All our club officers have been in office for 5 years or more and unlike real politicians - many are willing to step down and make way for new talent.

Give it some thought, twist a couple of arms, and talk to Don Miller (he has the inside scoop) if you are interested in helping the club be successful in future.

Thanks, Earl

AIR-SHOW ACCIDENT

Brace yourself before looking at the image on page two. A pilot at low level has no control over his aircraft. It narrowly misses a crowd gathered for the air-show and slams into four buildings. One can only imagine the horror of the occupants inside those buildings.

CALENDAR OF EVENTS

Oct 17th (3rd Sunday) Club Meeting @ GC Senior Center 3PM (Nominations for 2011 Officers)

Field Closed, Fri, Oct 22 Cross Country

Field Closed Thursday, Nov 4, 8AM to 5PM ROTC

Nov 7th (1st Sunday) Club Meeting @ GC Senior Center 3PM

Dec 12th (2nd Sunday) Club Meeting @ GC Senior Center 3PM

Every Member is a Safety Officer (Keep up the good work!)

Rich Mowery Enterprises

Gentleman,

Here is a deal..... I sell a profile ARF & 26cc gas engine Combo for \$400.00. ESRC members may purchase it for \$375.00.

This Combo comes with everything and I mean everything you need to get in the Air fast. I include extensions, connector locks prop, servo arms, screws for servo's, fuel tank & lines. Hardware and turn-buckles also included. Only other parts necessary to fly the plane are servos, 4.8 battery pack for ignition. The ignition will even work on a DA 50cc, DLE.

I have a dealership for JR/Horizon, Great Planes, Hitec and Main Hobbies. DLE 20cc, 30cc, 50cc 100cc and the DLE-222 4 cylinder.

Call me, Rich

JR921 9 Channel DSM2 #JRPR921

JR922 9 Channel DSM2 Powersafe
Receive

**No tax or shipping on any
products. If you don't see ask.**

Safety Notes:

Here are some worthwhile safety issues that came up at our last meeting.

- A club member recently lost control of his aircraft with a new 2.4 transmitter/receiver. All the batteries looked good so he sent the equipment back to the manufacturer for a look.

The problem was with the transmitter battery. It had a bad cell that did not show up during the normal charge it - turn it on - use it cycle. It went into the fail safe mode and the model headed NORTH on its own and almost made it past the intersection!

Guess we all need to remove the transmitter battery once and a while and run it through a couple of cycles to get a better idea what condition it is in. May be time to ask Santa for a quality charger this Christmas.

- An anonymous Safety minded club member reported he has seen several folks starting their motor and then reaching over the prop to remove the glow starter and to make needle valve adjustments.

Ouch - please do all that from behind the prop.

Joe White Enterprises

The next time you see Joe at the field, ask him to show you the electric powered 3D foam airplanes he is making. Very cool and very maneuverable.

Websites Worth a Look

Don Miller found this jewel covering a U-2 orientation flight - - it is outstanding!

<http://www.wimp.com/breathtakingfootage/>

Cliff Wisser recommends you check out the USAF Thunderbirds new cost cutting measures. Times are tough and the AF is doing its bit to save taxpayers' dollars.
